Gold Port Reports 100 Geoprobe Holes Completed at Akaiwong

Vancouver -- Gold Port Resources Ltd. (The "Company")(TSX-V:GPO) is pleased to report that 100 Geoprobe soil sample holes have been completed at the Akaiwong Project, Guyana. The intent of the program was to identify areas of potential gold mineralization at surface. Holes have been drilled over a wide area of the project with the intent of developing surface gold trends. The equipment performed very well, and the program went without difficulty. Holes range in depth from 12 to 28 feet, depending on soil conditions.
